1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wills et al in view of Huber and Cloud III et al .

Wills et al discloses circuit for actuation of motor main drive operated from frequency converter with bridge see fig 7 and fig 3. Wills et al lacks disclosing auxiliary drive and domestic appliance. Huber discloses auxiliary drive see col 7 lines 30-46 and abstract. Cloud III et al discloses domestic appliance see fig 1 and abstract. It would have been obvious to one of ordinary skill in the art to combine the circuit of Wills et al with the auxiliary drive of Huber and appliance of Cloud III et al for fast and accurate positioning and guidance for improved control.

3. Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
